

# **BSCS-621 TOPIC OF CURRENT AGILE DEVELOPMENT**

## **Project Proposal**

### **Our Team:**

Project management and tracking system team

**Fatika Abab (Product Owner)**

**Mirza Hunaid Baig (Scrum Master)**

**Muhammad Huzaifa (Developer)**

**Mustafa (Developer)**

**Muhammad Ahsan (UI/UX Designer)**

## **Product Vision:**

The concept of our project revolves around providing a digital platform to students and faculty to efficiently process with project lifecycle and finding suitable matches for the project partner and supervisors. This project aims to enhance the consuming process of final year projects for all parties involved . Provides a platform for user to play their roles and making use of features that make management and communication easier .

This application would be a web based application the user for this application will be 'students' , 'faculty' and 'coordinator' .

## **Near Vision:**

An application where multiple users register first.

Log in and log out at any time.

Add their personal information i.e all their technical and soft skills

Make a project idea and upload it in a chat box .

Request to join the group/idea if their skills matches the project requirement .

Can approve and reject a member .

## **Far Vision:**

Allocate the space for each group according to their members

Track every member performance .
